Temperament

Yards	Crush	Paddock
Quiet: 30 head	Quiet: 28 head Slightly Stirry: 2 head	Temperament not assessed in Paddock

Heifers were good to handle in and through the yards. Two heifers were slightly agitated when in the crush. All heifers settled well when back in the mob and remained quiet when being photographed.

Handled With	Bikes
Assessor Comments	A line of very good to excellent quality PTIC heifers. Assessed as 77% large framed with the remainder medium framed. They are part of the Mooroobie stud and are all registered Angus heifers. Two PTIC yellow tag heifers visible in the videos/photos are part of the commercial herd and are also available to purchase post sale, by negotiation. All heifers were joined to two very good quality Mooroobie Angus bulls, (QBP23U181 & QBP23U67) both are low birth weight bulls and are well above breed average for IMF. Three heifers noted with a slight amount of white on and around the udder. One heifer had active pinkeye at assessment and was treated a week prior to assessment by a vet. The heifer will be monitored and if there is any active pinkeye present on day of delivery she will not be loaded without the buyers approval. This is a genuine opportunity to purchase high quality breeding heifers which are only for sale as they are outside of the vendors preferred calving window.
