Comment on Fat Score 1 Cattle	Steers display minimal fat cover generally due to recent rain and deteriorating poor season prior to rain. currently on a rising plane of nutrition, therefore strong to travel 800 km with a break required. If travelling further then 800km, after a 24 hour spell steers appear to be very capable of going further.		
Vendor Bred	Yes

Assessor Comments	EU Accredited, Quality line of majority Black Angus and Angus cross, number 4 STEERS. Weaned September 2024. A line of store flat back steers offering an astute buyer the opportunity to acquire a line with plenty of frame in light condition to take advantage of a large COMPENSATORY GAIN on fresh productive pasture. Mostly good to fair confirmation, depth and length contributing to heavy carcase dressing weights when finished. Well handled, displaying generally good temperament. Good quality and fair frame. Steers ideal to take on for backgrounding to a feedlot or grass bullocks. Herd is originally Ex "Tey's Brothers" (Dams included in property transaction). Approximately 2 steers in this line noted for a small blue scar on eye, not appearing to be majorly effecting vision. 1 other Mobs available this sale of the same steers, except they are red to make 6 decks
