	These weaners have only been weaned for the past few weeks and are still fairly flighty. There are ring leaders that tend to move rapidly in the bigger yards and they need to be steadied down through a gateway, not unusual. Nothing in the mob that could be considered aggressive. Would encourage buyers to allow steers sufficient time to settle down on arrival prior to being shown the 'bush gate'. Would benefit from further weaning protocols and maybe tailed out.		
Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Dogs		
Notable Traits	Traits 4 Head Ring worm scar		
Assessor Comments	Buyers, 4-decks of Consuelo EU ACCREDITED and PCAS ELIGIBLE Santa backgrounder steers that have developed a great reputation. Have been offered on A+ for the past 10 years and always seem to attract plenty of repeat buyers who have commented on the great performance these steers deliver them. They have presented mostly in fresh condition and look to be doing very well on the good quality feed in front of them. The steers show tremendous growth and fleshing and are starting to muscled up well. Most demonstrate good of weight for age, breed character with depth of barrel, bone and length. They are genetically very sound cattle and would be ideal to put away with a view to getting access to a winter oats crop and take out to heavier weights for entry into an export or domestic feedlot. These have been split into 2 lines with a total of 331 in this draft all up. Clean country buyers note they are offered GUARANTEED CLEAR of the dip.
