Assessor Comments	Buyers a great opportunity to secure a VGQ line of store condition no4 Santa steers. Steers are bred from large framed Rosevale blood Santa cows Sired by high priced Santa sires from Queenslands leading studs These steers have the frame and depth of breeding to explode on grass or grain and show the length ,depth and bone to keep performing .Drafted into the Domestic Feeder weight range 310-390 kg to suit feedlot entry however steers would ideally suit to put away for upcoming oats crop and take through to heavy feeders ,Alternatively they would suit the Bullock producer to take through to Lucrative grass fed ox. Please note two steers showed some old fly rub marks and one showed old blight scarring in one eye neither considered detrimental Steers treated with Compudose 200 at branding and Compudose 100 on 28/1/25 .Vendor has 1 deck colored brothers this sale.
