Assessor Comments	Angus weaners that are ready to go, having had all there animal husbandry done. These weaners have been running out in the pastoral country north of Conargo on "Cooimbil." The cows were bred down in Victoria on 'Barton' Station and are part of a 2500 head herd that are all up in the north, which is the reason why they're not going home. These weaners have all the performance breeding to do well wherever they go. Note there are two other lots of cattle off this property in this sale. Also any cattle showing signs of pink eye infection were removed at assessment, though note there could be more show up by delivery.
