Assessor Comments	A good line of commercial proven breeders, 105 x 106 Angus Cows & F1 Wagyu Calves at foot. Cows are currently doing an exceptional job on calves, with only one calf being born in the last month balance of drop 2-6 months old. 91 Cows are PTIC 1 - 3.5 months at assessment, a few cows where only just 4-5 weeks PTIC which I would expect a few more to become PTIC. Cows purchased as heifers in 2019 all Eagle Hawk Blood and kept progeny in 2021 to breed from. The cows would compliment any commercial operation. An opportunity to purchase a quality line of cows & calves with the majority back in calf, with quality genetics at foot. Please note calves where only marked 5 weeks ago. Buy with confidence.
