1 Head White spot on the Navel

Assessor Comments

Nice line of Rennylea Angus Blood matrons, brought in as young PTIC cows, and have continued to rear an outstanding calf every year, always making it to ideal feedlot specs by 13-15mths. Cows still showing very good fertility & longevity, all sound in the feet, teeth & udders, and could easily go around again after this calving. This small lot of proven breeders would suit a number of operations, be it to top up numbers, go to a hobby farmer, or take advantage of the weight in these females, calve them down & appreciate the split value.
