|                        | Heifers flowed well through yards, some were quite agitated when isolated and would need to be slowed through gates but were quite calm in bigger yards. More breaking would benefit these heifers although temperament was not unusual for breed.                                                                                                                                                                                                                                                                                                                                                                                                  |                                                              |                                     |

| Assessor Comments      | 87 Droughtmaster & Angus, Santa & Brahman Cross heifers on offer. Heifers are showing great growth for age, bone and will bounce on good feed. Heifers were weighed after long overnight dry curfew and pregnancy testing. Heifers present in fresh to store condition growing out nicely on Thallon buffel country. All heifers have been purchased in and PTIC sisters have been retained to increase vendors breeding herd. There were 7 Spayed heifers included in this assessment and can be removed at delivery if buyer wishing to breed from these heifers. The 7 heifers had an average weight of 395kg to take into account when bidding. |                                                              |                                     |
