Assessor Comments	A good line of very quiet Angus heifers, on their first calf. This line of first calvers were purchased privately as part of a larger lot of PTIC heifers out of SA, before being calved down & mothered into lines based on calf colour. This line represents the heifers which have calved to black calves. Heifers present as mostly good to medium in frame, with the odd heifer showing a little more stretch & height. They are producing plenty of milk, which is nourishing a very attractive & even line of marked & vaccinated FISH CREEK FARMS SPECKLE PARK sired calves. Presenting in fresh store condition these heifers are cleaning up in the coat, & would put considerable weight on quickly with access to fresher, more available feed. A great opportunity to secure very good quality, exceptionally quiet, young breeders with sappy Speckle Park calves at foot & a lifetime of production ahead of them. Another line of 16 heifers with black/white speckled Speckle Park sired calves at foot also on offer.
