| Assessor Comments      | A nice line of well bred, station mated RENNYLEA Angus cow & calf units, on their 1st calf. These heifers are developing well, presenting in store, to forward store condition, with good frame & growth for age. Heifers are producing plenty of milk, which is contributing to the high growth rate for age of the marked & vaccinated RENNYLEA Angus sired calves at foot. They are displaying good conformation & were purchased from a breeder with a herd based on RENNYLEA Angus blood for years, with a focus on producing soft, easy doing females with high growth rates & excellent fertility. # Buyers note, 1 bonus calf due to twins. A great chance to secure quality young breeders in the prime of their lives, which have calved with ease to leading RENNYLEA Angus sires & a lifetime of production ahead of them. A sound opportunity to replace older breeders with young ones, at minimal extra cost, with supply likely to become increasingly hard to find should a seasonal break in the Autumn eventuate. |            |                         |                |
