Assessor Comments	An attractive line of predominately vendor bred Angus Cross Angus Heifers. Heifers are not station mated and are considered ideal for most commercial Angus breeding operations or alternatively to feed to high quality carcass grades on either grass or grain. Heifers have good growth for age, softness and femininity, to allow them to be joined to your bull of choice immediately. 7 heifers have slight patches of white mostly on the udder, 1 heifer observed with old pink eye scaring in one eye.
