	These cows were very good to handle in all parts of yards, they worked well through yards whilst calves were drafted off, worked well into race and crush. Please note some cows did become slightly agitated whilst in crush being weighed (Not unusual). The calves were good to handle when with cows although moved off with pace when not with their mothers.

Assessor Comments	Buyers here is an opportunity to purchase a line of very well bred Angus cows on their first calves. These cows were purchased ex Walgett in May 2024 as PTIC heifers with the idea to retain as breeders, although are now being sold as cows and calves due to dry seasonal conditions. These cows present in store condition and are putting everything into the sappy TeMania Blood Angus calves at foot. The cows have been joined back to TEXAS Angus bulls since 1st January and will continue to run with these bulls up until delivery. Young Angus cows and calves with all their lives ahead of them don't come up often, an opportunity not to missed by anyone looking for breeders to retain in herd.
