Assessor Comments	On offer are a line of Dunoon Blood PTIC heifers joined to LBW Milong HBR Angus bulls for a 8 week calving starting the 1st of June. Impeccably bred heifers that were purchased to maximise winter grazing on flood out country last year, buy with confidence with all the backgrounding and joining done correctly. Long smooth heifers that will grow into large framed cows, only selling as they won't link up with the rest of the heifer calving program at Wilga. Odd heifer has white on the udder as seen in video but nothing too dramatic or too much for the Angus standard. Cattle were curfewed over night 10 hours hence the Neg 1% adjustment. * please note there is also 7 vendor bred heifers in same sale that would help with trucking. Vet tested by Wyalong Vet Clinic, certificate available.
