|                                       | Quiet: 50 head<br>Slightly Stirry: 55 head<br><br>Heifers were weaned at assessment so understandably some agitated and some run. Vendor will make every effort to handle wearers while yard weaned until delivery. Purchaser should drop cattle in yards on arrival and make own decision on whether cattle need more education. In paddock cattle were still on mum so appeared reasonably quiet but a bit difficult to tell. During assessment cattle did appear to settle as assessment went on.                                                                                                                                                       |
| Handled With                          | Bikes , Vehicles                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Assessor Comments                     | 105 Angus Heifers , 7/8 months old. Ave 297 kg. Well bred , well grown heifers in forward store condition. Heifers present as an even line with underweights & of types pulled off. Ideal heifers to feed on as plenty of shape & bone. Complete drop of heifers from an age group of cows so would suit as future breeders. Please note bulls were with their mothers 2 months ago so minimal possibility the lead of these heifers could have joined. Vendor happy to needle if purchaser wishes. Heifers are now in weaning yards and will stay there until delivery. Realistic reserve for well bred station heifers , please ring with any questions. |
