Assessor Comments	Excellent vendor bred line of 2023 drop EU Accredited Angus heifers, scanned in calf to vendor bred Angus bulls to commence calving early August for 8 weeks. These females bloodlines were originally part of the renowned Glen Collin herd before family succession. These cattle enjoy a great reputation for their "doing" ability and capacity to put calves on the ground. Ultimately these cattle are bred for their performance in the long fed feedlots or EU / MSA slaughter markets. These females are in calf to vendor bred bulls out of the elite Glen Collin stud herd being sons of Ben Nevis Powder Keg and Baldrige Beastmode. These females are only on the market due to reducing breeder numbers. These females would suit the most astute angus breeder and an ideal line of females for anyone wanting top self breeders. Please note, odd blue eye, not detrimental.
