Assessor Comments	Buyers an opportunity has presented itself to obtain some young females carrying years of high quality Booroomooka genetics. These heifers are moderate to large framed PTIC for their first calf in May/June. The Merrilong herd is self replacing and have exclusively purchased high indexing Booroomooka bulls for many years. I believe any Angus breeder would refer to these as 'Front Paddock' heifers and they come with my highest recommendation. Please note same vendor has another 32 heifers in same sale with slightly different calving.
