Assessor Comments	Quality line of rising 7 year old PTIC Angus cows. Females are PTIC for a tight 6 week calving commencing late July 2025. Joined to high indexing Dunoon Angus sire R929 (EBV attached). These fertile & productive breeders had weaners taken off at pregnancy testing and have done an excellent job raising their calves. This is a good opportunity to secure a line of sound breeding females with all the work done and take advantage of the rising cattle market.
