Assessor Comments	68 Angus heifers PTIC 6 months plus. They are surplus to requirement females and don't match in current calving times. Heifers have been running on SE properties since August last year and have done it tough due to the season. Cattle handled well in yards and crush. Heifers will improve quickly on feed, plenty of frame just light in condition, will grow into moderate framed females. These would suit restocker or trader. The cattle have been joined on the stations to Angus bulls but no certainty given to odd mickey bulls. The Willoway cattle are known for calving ease and constitution. Another 60 females in todays sale.
