	Generally, steers moved well through the yards during the assessment process. Steers were calm through the race and onto the crush to be weighed with only a few steers pushing forward. As a mob in the larger pens steers were flighty when applying force to move them but then walked calmly for photos and videos.

Assessor Comments	On offer is an exceptional line of weaned Angus steers. These steers are the last of the Taberner Pastoral Co's spring calves and come with the highest recommendation. It is a very even lot of steers weighing from 251kg- 314kg. These steers are up to date with all their animal health treatments and have been performing well on digit grass. Calves are 7.5 - 9 months, have been weaned since the 15th of January and are Alloura Angus Blood. Traditionally steers are retained and grown into bullocks but due to the dry season are being sold early. Show these calves feed and they will power ahead. A great opportunity to purchase a lot of 1-mark steers that are renowned performers.
