Assessor Comments A quality line of rising 5- and 6-year-old PTIC Angus Cows that will commence calving on the 30th of July for a tight 7 weeks. Cows are joined to registered Landfall and Dunoon bulls (sire IDs listed in assessment) selected with a focus on early growth, fertility and structure. These girls are proven breeders with sappy calves weaned off them two weeks ago that average 278kgs. Cows have had regular handling and are easy to work with. Cows were purchased back in 2021 as either heifers and calves or weaners that were then joined. They are only being sold to reduce numbers due to the tightening season. These cows would complement or improve any commercial breeding operation. A good opportunity to step into some quality cows in their most productive years.
