	Traits
3 Head	Cloudy Eye/Pink Eye Scarring Not Detrimental
1 Head	longer front toe
1 Head	Pinkeye (Treated & Patched)
3 Head	White markings in front of flanks

Assessor Comments
58 PTIC Rennylea Angus blood cows. They are 6.5-7 years of age (August 2018 drop). These cows would normally be retained within the herd and are only becoming available due to the prolonged dry conditions. These cows have been scanned in calf every year with dry cows sold annually. PTIC to commence calving late July/August to high indexing Rennylea Angus sires, with the Hearn family targeting bulls with high 400 day growth, high IMF, calving ease, and must have near perfect structure, and it shows in these cows as they are large framed matrons with great structural soundness. Anyone looking to get a herd started you couldn't look past the genetics of these cows, with 30 years of Rennylea Angus genetics behind them they would form a strong foundation and get you started off on the front foot.
