Temperament not assessed in
Paddock

All heifers up until weaning had minimal handling. They were a pleasure to handle and assess and for their second time in the yards they were easily handled. They will be handled through the yards and tailed out daily up until delivery with a strict weaning/education program in place. Temperament is a key factor in selecting new Genetics throughout the CELAMBA herd. The odd heifer become slightly stirry when pressured when returned to mob returned to calm state. Excellent Temperament.

Assessor Comments

Buyers on offer is a chance to acquire a fantastic line of Speckle & Speckle infused heifers coming from one of the leading Speckle Park Studs in Queensland. These cattle owned by Josh & Karla Schwerin are run in conjunction with the CELAMBA herd who also have 47 heifers on offer in the sale. These heifers are out of Classified Santa Cows originally owned by the CELAMBA Santa Stud. These heifers are exceptionally quiet and will only become docile with further handling. The heifers express exceptional shape and muscle expression and will grow out into a tremendous line of Breeders. This is a great opportunity to buy a well bred line of weaners to grow out to suit all domestic markets. Given the length of breeding in these heifers they would be ideal to grow out to future breeders.
