Handled With	Bikes , Dogs		

Notable Traits		
	Traits	
	1 Head	Active Pink Eye in one eye, treated and patched.
	2 Head	Heifer had white markings under belly region to navel.

Assessor Comments	A very good Quality line of well bred EU Angus weaner heifers that are 100 % Glenavon angus blood. This line of Heifer Weaners will not only suit the the accredited EU breeders but any one looking for a very smart female to top up there herd or to be base for their future herd. Heifers have been weaned over two months and are really going forward after a going through a tough summer. Heifers are famine types that show stretch and softness that should continue to grow into lovely females. A focus and emphasis is put on IMF with high marbling bulls being used, 600 day weight, mature cow weight and milk in the EBV traits when selecting bulls as the cow herd supports a high marbling F1 Program. This annual draft is due to heifers being surplus to requirements and now offers a great opportunity to any one to fast track their production plan by introducing these heifers backed with quality Glenavon genetics that has been built up over many years.
