Assessor Comments	Excellent line of EU Accredited Angus heifer that have been AI'D to Rennylea T406, a low birthweight Angus bull with curve bending figures. Heifers were AI'D on the 22/23/24th of October, scanned in calf on Monday the 28th of April and due to commence calving midJuly. These females were purchased as weaner heifers from 2 vendors, predominantly the largest portion being from fox pastoral in Victoria, the remainder being from Kenwood Park in Armidale. 188 heifers in this draft being sold as a run out the gate of 3 lots of 48 & 2 lots of 22. Heifer present in outstanding condition considering the wet conditions they have faced over the last 2 months and have had all the treatments. Well-bred EU females set to calve all within a week of each other, exactly how you want to calve heifers down. Please note, odd heifer with blue eye scarring not detrimental. Please note, vendor has 108 heifers, naturally joined for 6 weeks in the same sale.
