|                                       | The vendors have spent a lot of time working with these cows which shows in their handling and temperament. Cows are worked with bikes, side by sides and dogs. All cows moved through the assessment processes smoothly and only a few became upset when being mouthed but once out of the crush they were calm.                                                                                                                                                                                                                                                                                                                                                         |                            |                         |

| Assessor Comments                     | A nice line of young Angus Cows PTIC to Bongongo and Romani Angus bulls to commence calving on the 1st of August for 10 weeks. Cows are 3.5 to 4.5 years old, Jarabee & Riddellvue Blood and up to date with all their animal health treatments. These cows are medium to large frame and holding condition well in a deteriorating season. These females did a fantastic job on their calves this year, despite being weaned early in late February all calves averaged 260kg. A lot of effort has gone into handling these cows, their temperament is a feature. A great opportunity to purchase a large run of cows entering the most productive years of their lives. |                            |                         |
