Assessor Comments: 35 X 35 Station Mated Cows & Calves, High Spa Blood, 1st/2nd Calving Cows presenting in genuine store condition. Cows have put everything into their calves up to this point, although have received a check in the past moth due to lack of paddock feed, only receiving Vetch Hay. Calves averaged 179kgs at assessment, 1 steer calf is an outlier at 323kgs being an earlier drop whilst balance of calves are predominantly Oct/Nov Drop, with the bull put with cows at commencement of calving (28/9/24) 25 Cows PTIC by Robyn Harris on the 6/2/25 to calve in the late Winter, whilst balance was undetectable at this time. Both Cows & Calves would power forward on correct nutrition & would be an excellent prospect to split. 4 Calves have ringworm around the eyes & on face. 4 Calves self weaned off cows in the past month, showing orphan traits. Cows are tagged according to year born, 26 - 2021 Drop, 9 2022 Drop.
