Assessor Comments	25 Stabilizer/Angus Cows PTIC to Boonaroo Angus bulls to commence calve early August for 9 weeks, Cows are genuine 2015 'L' drops and have just had their calves weaned off them a week ago. Cows are of large frame and have been excellent breeders and produced quality calves each year, they are now only being sold due to water being tight. Cows are of large frame and will come with nice upside to calve down and split later on, cows are structurally very sound and have the frame to stack the weight on when the feed comes. Vendor needs to move on so will be priced to sell.
