| Assessor Comments      | 12 pregnant angus third calf cows rising 5yo, in calf to angus bulls to calve in July, with red vet PTIC tags (will need to be removed by purchaser). Cows were purchased from New England NSW as 1st calvers. Noticeable raw patches on neck & eyes from active buffalo fly irritation. Moderate frame breeders with large weaners taken off recently. 2 head have soft lumps under jaw with vet inspecting as preg testing carried out. Vet given no problems on inspection. 1 cow noticed with recent blight with no discharge & looks to be recovering (will be checked at delivery), 1 cow with blue eye from past blight, no issue. No feet, leg, or body issues observed & cows show no mobility issues. Had annual vaccinations with no recent internal/external parasite treatments. 6 red angus cows in this sale have been running together with this lot. Herd reductions taking place with vendor reducing breeder numbers to align with comfortable safe carrying capacity. |
