These weaner steers were excellent to draft in the pound and weigh. During photos they were content and a pleasure to walk through with ease. Temperament I couldn't fault

Assessor Comments A tremendous line of 72 Pure Angus Weaned Heifers which have excellent length, growth and muscle. The Sharpe family have invested highly in Angus genetics over the last 20 years with there herd being built on the Clunie range and Wattletop genetics. These steers have been yarded since Saturday and will remain on good quality barley hay in yards until delivery. As seen in videos these steers were a pleasure to draft and assess, they flowed through the yards extremely well and were content in the whole process. Overall this is a front paddock line of steers which would i would highly recommend.
