	The heifers were good to handle in the yards. Three heifers wouldn't settle in the crush and exited quickly. However, given that they have just come off the cows and have had limited handling throughout the yards they were generally good to handle.												
Handled With	Bikes , Vehicles												
Assessor Comments	A mostly good to very good quality line of Angus with two Angus cross. Yard weaned at assessment, heifers will be fed green barley & oaten hay and worked through the yards until delivery. All heifers had their first shot of 5 in 1 at branding in December. 30% large framed, 55% medium framed and the remainder smaller. The Angus heifers in this line suit major feedlot specifications. Two heifers are showing very slight navel or have greying in coat. These heifers would suit to take to feeder weights or the top 43% have the potential to make very good quality future breeders, no heifers are being retained from this drop. Heifers have not had access to any grain or cotton seed.
