|                                       | Heifers were good to handle in the yards. Five heifers wouldn't stand in the crush and exited quickly. However, given that they have just come off the cows and have had limited handling throughout the yards they were generally good to handle.                                                                                                                                                                                                                                                    |     |                                           |                                     |
| Assessor Comments                     | A mostly good to very good quality line of soft composite heifers. Yard weaned at assessment, heifers will be fed green barley & oaten hay and worked through the yards until delivery. 15% Large framed, 80% medium framed and the remainder smaller framed. These heifers would suit to take to feeder weights, or the top 40% have the potential to be very good quality future breeders. No heifers are being retained out of this drop. Heifers have not had access to any grain or cotton seed. |     |                                           |                                     |
