	Steers temperament is a credit to the vendors weaner breaking methods, they flowed calmly through the yards and were a pleasure to handle. Please note the steers a small percentage of steers became slightly agitated when pressure was applied but quickly settled once released, typical of weaner behavior.

They show good weight for age with a live weigh range of 205kg to 392kg to average 281.8kg at assessment. These steers come from a heard with a good reputation for weight gain on grass or grain and are ready to power ahead on good feed when given the opportunity.
