Assessor Comments	A good quality line of Angus x Angus feeder steers that offer great compensatory weight gains as steers have been hindered by relentless wet weather over the past 10 weeks. The stony station herd is a foundation of Stud Hazeldean cows. These steers were sired by AI sons of the the leading Angus sire in Murry El Grando G20. Steers are all frame and will bounce away given some sun on their back in Feedlot environment or quality pasture while backgrounding, weighed into a tight group weighing between 368 TO 433 Kgs full at assessment. Usually sold direct to feedlots at heavier weights but with winter on the door step steers must be sold, great feeder types to go straight on to feed, please see another line of lighter steers in this same sale from the same vendor - 141 over two lots. Grass Fed and Antibiotic Free.
