Assessor Comments	Buyers, here is a light 4 deck line of PTIC aged cows that would be an ideal trade mob. These cows are weaner mums, having their weaners pulled off them at the start of last week. They did a fantastic job on their calves averaging over 280kg and it is expected that they will do the same thing on their future calf. Cows are PTIC in a 90 day joining period to composite bulls made up of a Shorthorn, Shawal cross. They are due to begin calving approximately the 20/07/25 and be finished approximately 20/10/25. Cows are assessed as 35% large frame, 35% medium frame and 30% Small frame. NOTE, there were 3 cows out of 40 mouthed in this lot found to have worn teeth. Please note, there is one cow with a small dog bite on here near side rear leg, one cow with an old cyst scar and lump on her jaw, one cow with a slightly capped hip and one cow showing fly bite scaring. All deemed not to be detrimental to the cows however, please take into consideration when bidding. See photos.
