These Heifers drafted up well when separated away from their mates, a couple of heifers ran around a little but at no time were we concerned. Overall, once in pound yard they walked up to crush for assessment and weighing and then walked quietly back to the yard with the others, just a little unsettled after earlier mustering.

Assessor Comments	A nice draft of Crossbred heifers, plenty of quality and style displayed. These Heifers have been grazing in a Leucaena paddock and are showing great potential as feeder heifers or would be great as replacement breeders. Standing on good bone and showing plenty of depth and muscle these heifers have potential to carry weight. Definitely happy with how the heifers drafted up. We opened the mouths on a few of these heifers, and they displayed milk teeth. Heifers are well developed and good growth shown. There is no bull running on this property..Would make great breeders or ideal as heavy feeder heifers,
