Assessor Comments	Excellent quality line of pure Rennylea blood Angus weaner Heifers, all weighed into a tight weight bracket of 232-294kg to average 270kg full at assessment. Bred out of a fantastic commercial herd that has used the top end Rennylea genetics since 2010 (see Sire IDs in extended breed description). These are a lovely even line of soft coated heifers with their very quiet temperament being a big feature. Heifers are yard weaned & well educated being handled daily through the weaning process. The herd is recognised for their performance & marbling by feedlotters making these ideal heifers to suit someone looking to improve quality of their Angus herd or for an F1 Wagyu program. Past purchasers of these heifers have been extremely impressed with these heifers and they come with my highest recommendation.
