Assessor Comments	68 EU steers representing the lead draft of 235 mixed sex weaners being the Hereford steers from the Warra Yadin Hereford herd. These steers show the classic traits of the Hereford breed and have the capacity to suit feeder steers or be taken through to bullocks. These steers have done well since weaning in tough seasonal conditions and have been trail fed a beef weaner pellet and straw from mid January and have continued to grow. There has been an extensive range of Poll Hereford genetics used to produce these steers utilising AI from top Hereford studs through to Warra Yadin blood bulls. Noted high performance cattle that have always performed well for previous buyers on grass and grain. Two steers observed with a cloudy eye, but not seen as detrimental. Please note vendor has one other lot of steers in today's sale.
