Assessor Comments	A great opportunity to secure a Very Neat even line of Angus heifers that are one mark. This line of heifers are PTIC to a Quality LBW Bald Blair Angus bull and were joined over an tight 6 week period to start calving from late August. Heifers were purchased from the Tenterfield area off Coolvale Pty Ltd late last year and are a base of Eaglehawk Angus Genetics, Heifers are growing out well considering a recent 10 weeks of very wet weather. Soft easy doing moderate framed future breeders that are great commercial articles with all the hard work done. Temperament a key with all heifers being very quite and easy too handle. With the cattle market heating up and recent rain in some southern regions its time to capitalize and get set with Females that only offer up side, offering many options after calving in what got be very a very strong market over the next 12 months. Not to be missed.
