Assessor Comments	An outstanding line of 29 vendor-bred 'Table Top' Angus blood PTIC cows, classed in breeders to commence calving July/August. This is a rare opportunity to purchase from a herd typically retained, now offered due to seasonal conditions. These cows show excellent frame, structure, and breed type, and are proven breeders consistently producing high-quality progeny. The Plum family's cattle are renowned for reaching feeder weights between 9 and 11 months of age. Please note: Most cows display white spots or patches on their udders. One cow has a blue eye – buyer has the option to exclude her from the purchase. Please refer to the photos for further details.
