Assessor Comments

A nice of Angus weaned steers, Steers have had a Bo villus, Rhino guard back in March weighed into a weight range of 280- 341kg range at assessment. Steers have been weaned onto crop, Steers are bred out of a self replacing cow herd based on Eaglehawk bloodlines, Steers will respond very well to a few sunny days. Steers have had 400mm of rain on

there back in the last month. Steers still show great bone and given the right opportunity will continue to go forward and would suit feeder markets or MSA slaughter markets. Buyers please note vendor has other lot in sale of lighter draft to secure a light B double
