cattle handled well at assessment for non educated weaners, the cattle as a mob are generally calm cattle with the odd steer becoming very nervous under human pressure. These steers will continue to be handled up until delivery, proper education and weaning processes would be suggested upon taking delivery of the stock.

Handled With	Bikes
Assessor Comments	Buyers a small but very good quality line of Angus cross steers for your consideration. The Kibble cattle are very well bred stock that perform well on grass and grain, these little Angus cross steers are bred on lighter country and will do very well if given the chance. The steers possess good weight for age while still retaining plenty of frame for the successful purchasers. These steers were pulled off their mothers and curfewed 24 hours before assessment and will now be fed very good lucerne and oaten hay up until delivery. This is an opportunity to secure good quality lightweight Angus cross steers to take onto heavier markets. Please note that the same vendor has another line of ANGUS steers in the same auctions plus sale.
