For Pastoral bred heifers these heifers penned up and flowed through the pound, race and weigh box well.

Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Dogs
Assessor Comments	Buyers these heifers have grown exceptionally well since purchasing as light weights in December. I mouthed a heifer that looked to be a bit older and she was solid milk tooth, by their weights at assessment and purchase weights these heifers are good well bred young feeder / crop heifers that will be ideal for either taking to heavier feeder weights, lot feeding now or putting on winter crop and taking through to either domestic or export slaughter weights. The frame, bone, and growth rates of these cattle suggest that they have endless options to the purchaser. They have never had access to bulls/ stags since purchasing and vendor believes where too light prior to him purchasing them to be capable of conceiving. These cattle show good muscling, weight for age & breeding. Located 50km north of Bollon, 147km south of Mitchell & 135km west of St George these heifers are centrally located. I recommend these Heifers.
