| Assessor Comments      | Top quality line of vendor bred females PTIC to commence calving end of august for 6 weeks. Cows are genuine medium to large frame types and carry their weight well. They are soft easy doing types and present in sound condition for their age. This sale represents a genuine herd reduction to manage the large number of younger females on hand going into the winter. All cows weaned calves this year and dries are removed annually. Progeny of these females are generally grown out on vendors southern farms to feedlot weights. Unknown percentage of exact Blue E genetic break up but vast majority of females exhibit strong Angus characteristics. 2 cows appear to more forward in calf then the rest of the mob. Fit to load guidelines will be followed if they are not right at delivery. Cows present evenly and would be a welcomed addition to any operation. Note 84 cows in this line to be offered in two even groups. Vendor also offering 11 PTIC cows alongside 118 PTIC heifers off another property. |                         |                                     |
