Temperament

Yards

Crush

Paddock

	Quiet: 70 head	Quiet: 67 head Slightly Stirry: 3 head	Temperament not assessed in Paddock
Handled With	Heifers were very good to handle at assessment. They are handled by experienced stock people and this was evident at assessment. Bikes , Dogs , Vehicles		
Notable Traits	Traits 7 Head White patches on udder or through navel area(approx total mob)		
Assessor Comments	Excellent quality line of vendor bred heifers PTIC to commence calving end of august for 6 weeks. Heifers are genuine medium to large frame types and carry their weight well. They are soft easy doing types and are in excellent condition leading into winter and into their final trimester of pregnancy. Heifers are a direct result of a sound breeding program and a well managed operation. Unknown percentage of exact Blue E genetic break up but vast majority of females exhibit strong Angus characteristics. Heifers present evenly and would be a welcomed addition to any operation. Note joining details: 70% joined to Gilmandyke heifer bulls and 30% to Coota Park Blue heifer bulls. Note 118 heifers in this line to be offered in two groups. Vendor also offering 3 lines of PTIC cows off another property as part of a genuine herd reduction. Top quality females worthy of close inspection. Please call for further information and view video to fully appreciate these females.
