|                        | The cows were good to handle in the race & crush. One head was very unsettled in the crush and exited quickly. They all settled down in the yards and remained quiet for photos/videos                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                               |                         |                                     |

| Assessor Comments      | A fair to good and mostly very good quality line of Angus and Angus x cows PTIC to Angus bulls. These rising four year old cows were purchased as weaners and have just had their second calf weaned off them. The cows are mostly medium to large frame with four cows small framed cows in the line. Three cows noted with white on their udder and another three cows with a small amount of navel but not showing any Bos Indicus content. They were joined to Lawson Angus bulls from 20/02/25 to 15/05/25 and were scanned as 6 weeks to 4 months in calf (see breakup in joining details). Two cows noted with mild to moderate pink eye scarring (see photo) and two cows with NLIS tags located in the incorrect ear. Decent quality young cows in calf to Angus bulls for a summer calving. |                               |                         |                                     |
