Assessor Comments	This neat line of PTIC heifers, present in forward to forward prime condition. Heifers are joined back to the low birth weight Mirrah Murra cluster bull and are due for an early spring drop. Heifers are just starting to feel the winter conditioning have been getting feed pasture hay and are very nice to handle in the paddock. Vendor did intend to keep heifers to breed but has felt the pinch of winter and doesn't have enough feed to carry them through.
