	Cattle are very quiet and showed no hesitation as being walked through for photographing and moved into scales/crush area very steadily and off work area with no noticeable issues, cattle are very well handled and worked through excellent facilities.			
Handled With	Bikes , Dogs , On foot			
Assessor Comments	18 light angus weaners, 138 full weight and range of 79-201kgs. Been weaned and offered for sale as vendor needs to reduce overall numbers on property. Buffalo fly infestation very noticeable and stock show signs of irritation with no noticeable raw patches on body or face. 1 steer noticed with healed blue eye. 3 head had green elastrator rings applied at weighing and these 3 head have had no vaccine treatments. Stock show potential to grow into good quality young cattle given access to quality nutrition. Cattle have been in yard since the 22/04/25, show no sign of blight at this stage but with fly irritation and dust, it needs to be aware of.
