	Steers were good to handle at assessment. There was 4hd that got slightly agitated in the crush while being assessed and once returned to the mob then settled.		
Handled With	Bikes , Dogs		
Notable Traits	Traits 2 Head Active pinkeye (Treated at assessment) 1 Head White underbelly		
Assessor Comments	A good line of well bred Steers that have all been weaned and have had all of the hard work done. These Steers are ideal for a backgrounding operation with an Oats crop or good quality grass that these Steers can perform on to take through to heavier weights to suit Feedlot markets. These Steers present in good healthy store condition and look to have been effected heavily from Buffalo fly. I would recommend treating these Steers for opportunity for compensatory gains to be had. Please note the same vendor has 41 of the Heifer portion available in the same sale.
