Handled With	The steers were generally very good to handle given they have just come off the cows and had limited handling. They were also good to handle in the bigger yard and easy to move around. Bikes
Assessor Comments	The lighter end of a line of vendor bred Angus & Angus cross steers, well grown for age and showing good frame and conformation. These steers would generally be the younger of the drop. The 16% fair quality in this line lack a little shape. They were weaned the night before assessment and will be fed oaten hay and worked through the yards daily up until delivery. Ideally suited to take to export feeder weights or to finish on grass or crop as quality MSA slaughter steers. Note the heavier end of the drop of steers are also in this sale as well as the heifers.
