	These heifers have been running in a large mob under a rotational grazing system. They are easy to handle and respond very well to pressure. Due to supplementary feeding these heifers have had ample human interaction and were calm for assessment. They have been worked through the yards extensively as part of the weaning program and were a pleasure to process.

Assessor Comments	Opportunity knocks - never before offered at these weights. 209 hd Jul/Aug 2024 EU accredited "V" drop weaned heifers. Genuine breeder heifers direct the Scotts Angus commercial herd with decades of quality genetics behind them. This line represents the seconds (presumably younger) of the surplus heifers with less retained and reluctantly for sale due to seasonal conditions. They are presenting light in fat cover and will respond immediately to quality feed. Health treatments are up to date. 100% weighed from 140-179kg empty. A rare opportunity to purchase a large run of one mark breeders heifers from a performance recorded herd. They would compliment any herd and are an ideal proposition as future breeders for an Angus or F1 Wagyu program or your sire of choice. Antibiotic free and grass fed. Continued positive feedback reported from new and repeat buyers. Note vendor also offering: 164 hd of the tops to be offered in 4 lines consisting of 41 hd each - delivered as a run out the gate.
